PREVENT • PROTECT • PROLONG

Preventive maintenance programs improve the performance and safety of the equipment at your property. Prolong functionality, avoid unplanned downtime, and save money.

If You Have Any of These You'll Need an Annual Inspection:

- Overhead Doors
- Dock Equipment
- Fire Doors
- Gate Operators
- Alarms & Access Control
- Personnel Doors
- Security Cameras
- AAADM Inspection for Automatic Doors

Here's why you want to do preventative maintenance

- Save money
- Less equipment downtime
- No surprise major repairs
- Your equipment will last longer
- Scheduled repairs maintain efficiency
- Keep your team and facility safe

Saving You Time & Money

Any business can save **12-18%** by investing in preventive instead of reactive maintenance.

Businesses, on average, **spend 80%** of their time reacting to issues that arise rather than preventing them.

Get a Free Estimate to Certify & Test Your Fire Doors

Safety certification is required by insurance and building codes. Schedule a free assessment today:
